

KITCHEN FURNITURE

VILLEROY & BOCH

Tradition since 1748

Timeless elegance, innovative design and exceptional quality: this is what the name Villeroy & Boch has stood for decades. Based on this tradition, designers and product managers develop collections and concepts that create living environments. Like almost no other brand, Villeroy & Boch is deeply rooted in European culture. And just as only a major brand can do, it has managed to maintain its identity while keeping up with the times.

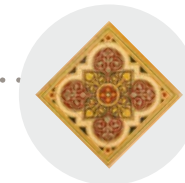

There are only a few companies in the world that can look back on 270 years of success. What began in 1748 with a small pottery in Audun-le Tiche, France, has now become one of the world's leading brands for tableware, bathroom and wellness. The unique mixture of family responsibility for eight generations and innovative management has made Villeroy & Boch worldwide successfully over the past centuries. Since its foundation, the company has not

only developed into a renowned ceramic manufacturer, but also into an international lifestyle brand. In the course of its 270-year history, various products have set milestones in the company's history. The 14 production sites in Europe, Mexico and Thailand are controlled from the company headquarters in Mettlach/Germany. Around 7,500 employees develop, design and manufacture high-quality ceramic products for markets in 125 countries.

ALT LUXEMBURG

The worldwide popular tableware series dates back to 1770 and is still part of the assortment today. It was recently reinterpreted under the name "Brindille".

METTLACHER PLATTEN

Eugen Boch's idea to produce a floor mosaic from ceramic for the first time was an unbelievable success at the time. From 1852 the tiles called "Mettlacher Platten" were produced in Mettlach.

NEWWAVE

For its special design and innovative die-casting process, the series was awarded the Innovation Prize of the German Economy in 2004.

VICLEAN

A modern shower toilet that combines hygiene, comfort, sustainability and innovative design and creates a new dimension in toilet culture.

CORE COMPETENCE

Ceramics

Ceramics have always shaped the history of Villeroy & Boch.
A material that has been constantly reinterpreted and continuously further developed
in the company. With love for craftsmanship. With the latest production methods.
And with a very precise eye for detail.

Villeroy & Boch is divided into the divisions bathroom and wellness and tableware and offers products for private households as well as for projects and objects. The interplay of elegant designs, innovative materials and technical expertise forms the special signature of Villeroy & Boch. The company has already set trends worldwide with numerous innovations. It is regarded as a driving innovator in the industry. In the bathroom and wellness sector, the DirectFlush WC without flushing rim sets new standards of hygiene with its intelligent water supply.

The industry-wide pioneering achievements also include the easy-care ceramic surface CeramicPlus and the material innovation Quaryl®, which enables particularly precise edges and thus an extraordinary shape design. In the field of tableware trends are being set with innovative shapes and food specials with special functions. The brand's modern products convince not only market partners and end consumers, but also jurors of internationally renowned design competitions. Numerous design and innovation awards confirm the constant development of the premium brand.

VILLEROY & BOCH

Kitchens

With kitchen furniture, together with the ceramic sinks and the kitchen taps, Villeroy & Boch is expanding the product range within the kitchen area, creating a whole brand programme from one single source. Thus, the product portfolio in the areas of bath and wellness, tableware and living becomes a holistic brand interior concept.

Villeroy & Boch stands for premium quality and a modern living culture, both important factors that have also been incorporated into the development of our new kitchen line. With special focus on function and design, our kitchens offer solutions for all requirements and plenty of room for individuality. Apart from our extensive basic range, our “Villeroy & Boch finest” collection offers a multi-faceted selection of special front colours and wood surfaces as well as exclusive ceramic surfaces which are only available in the Villeroy & Boch

collection. Glass shelves and real wood cutlery inserts are part of the basic equipment of the premium brand kitchens. The Villeroy & Boch kitchens combine a wide range of creative possibilities and special design with perfect functionality, leaving no wishes unfulfilled in terms of design and planning. Whether classic or extravagant, modern or traditional: there are plenty of kitchen options you can find at Villeroy & Boch. Be inspired.

METTLACHER PLATTEN

as an element of design

The “Mettlacher Platten” are an essential part of the success story of the Villeroy & Boch brand. Eugen Boch’s idea of producing a ceramic floor mosaic for the first time was an unbelievable success at the time and made the tiles and the brand known worldwide. We take up this success story: In the furniture we have reinterpreted the famous design of the mosaic tile and created an unmistakable furniture design with the element from the brand DNA.

In the German-French border region, the Villeroy and Boch families have experienced the development of Europe with its economic upturns, wars, and revolutions up close and have clearly shaped their time. At the center of the company was always one thing: ceramics. Even then, driven by a spirit of innovation, Villeroy & Boch developed ceramic floor tiles for the first time in the middle of the 19th century. These became an inimitable success: many tried and still try to copy them, but the quality of the original remains unrivalled to this day.

Around 1850 the first model was mass-produced in the large factory in Mettlach. The famous tile design with the model number 1 consisted of small rhombuses of five by five centimetres, which formed a mosaic together. This model of the first hour was characterized by the so-called “Trompe l’oeil” effect: The small rhombuses, in interaction with each other, pretend a spatial effect through perspective representation. In a modern way, this tile pattern can now be found as a design element in the new Villeroy & Boch furniture, giving it a very individual touch of its own.

The “Mettlacher Platte” – the original

Old originals of the “Mettlacher Platten” can still be found today in many places steeped in history. For example in the Cologne Cathedral or the Holland Tunnel, which connects the island of Manhattan with the mainland of New Jersey. The “Mettlacher Platten” were even used on the Titanic. These tiles can still be found today in the company headquarter, the Old Abbey in Mettlach. The original tile of the furniture pattern “Carré” has been laid here.

SINKS AND FITTINGS *by a master hand*

Stylish design has always been a trademark of Villeroy & Boch. With a fine feeling for trends, we design distinctive sink units that make your kitchen more beautiful and more comfortable. With loving attention to detail, our innovative products and solutions meet the requirements of the kitchen in a special way.

Making everyday kitchen life as simple, safe and comfortable as possible is the focus of Villeroy & Boch's product development. With this ambition in mind, new products and solutions are constantly being created that set standards in hygiene, functionality and durability and shape the living culture with contemporary design. A beautiful design is as much a part of the modern kitchen as good food. It becomes an expression of individual style and creates an atmosphere in which one loves to stay. With timeless modern shapes and designs, Villeroy & Boch turns

the sink unit into both a functional workplace and an aesthetic design object, and the kitchen into the stylish center of the home. Especially the ceramic sinks in strong colours and exclusive decors offer room for individuality. In addition, our high-quality and functional fittings adorn every sink. Attractive aesthetics meets individual shaping: whether in a classic stainless steel look or in modern metal colours – the designer kitchen fittings of Villeroy & Boch are just right for anyone who values something special, also when it comes to washing up.

A SYMBIOSIS OF FINE MATERIALS

A special eye-catcher: the marbled ceramic fronts in combination with matt laminate and the finishing with metallic accents. Whether, for example, Verde Comodoro, Nero Ingo, Bianco Male or Rosso Jaipur – you can combine as you wish.

LAMINATE SURFACES *with best features*

FENIX NTM® is a technical and aesthetic answer to two trends in interior design: Smart materials and matt surfaces with anti-fingerprint properties. Thanks to low light reflections and high scratch resistance, a long-lasting, impressive appearance is guaranteed.

UMBRELLA *Pure elegance brought into shape*

High-quality, functional fittings are not just a means to an end. They adorn every sink and are simply part of a modern sink area. With its special design language and the slim, highly curved spout, this tap is the icing on the cake of an elegant kitchen.

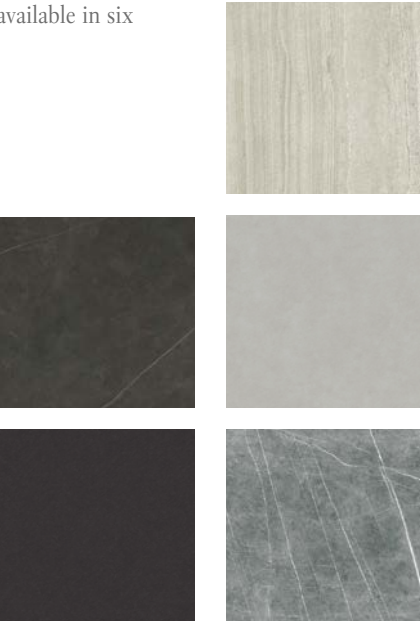

SUBWAY 50 S FLAT *As diverse as life itself*

Subway fits easily into any kitchen. Its clear design cuts an equally good figure in the modern kitchen as in a classic environment. With several sizes for base units of different widths, it leaves nothing to be desired. Discover the whole variety.

CERAMIC SURFACES *Premium-quality and exclusive*

Resistant to scratches and durable: kitchens with ceramic fronts and worktops. This natural product has proven its worth as a material: you can put a hot pot on it without hesitation. Scratches also have little chance with the hard material, which is available in six different colours.

MODERN HANDLE SOLUTIONS

for every kitchen style

From the floor plan down to the smallest detail: at Villeroy & Boch you are your own architect. With a wide range of handle designs, recessed grips and colours you can give your new kitchen the finishing touch and make an individual statement.

FINERA

For special personalities

Finera is a modern, perfect design of fittings that will give your kitchen that certain something. Characteristic design features are the fine, easy-to-use handle and the flat, high spout with swivel steel regulator.

Modern AND YET TIMELESS

The classic beauty of the ceramic surface “Calatorao Silk”, paired with dark, genuine wood made of precious walnut, provides your kitchen with a modern yet timeless character.

COOKING, EATING AND LIVING WITH VILLEROY & BOCH

Kitchens as well as living and dining areas are increasingly moving together to form open living worlds. Discover the numerous possible combinations of different surfaces and materials and design your own personal Villeroy & Boch home environment according to your wishes.

SUBWAY 50 SU

Perfect for every kitchen

Subway offers everything you could wish for in a sink: Whether a generous sink and a spacious draining board for the kitchen artists or rather the minimalist model as a substructure variant or single sinks in a simple household. Thanks to its unique diversity, it adapts perfectly to different needs.

SILUET 50

Always a good idea – for every kitchen

The fascinating design highlight for true aesthetes: With it, Villeroy & Boch creates the material of the future. For the innovative material TitanCeram, natural minerals are combined. Its high formability combined with maximum strength enables wafer-thin walls and sharp edges for sinks without sacrificing functionality.

STEEL SHOWER

Comfort of the extra class

Steel Shower is a highly functional variant of the Modern Steel fitting by Villeroy & Boch and impresses with its straight-lined, modern design. The solid stainless steel accentuates the functional orientation of this sink fitting.

TRANSFERRED TO THE PRESENT DAY

Expressive and special

The “Carré” fronts of the Villeroy & Boch collection take up the famous tile design in selected cabinet types as a pattern in the form of a relief. For those who prefer a calmer design, these fronts are also available with a smooth surface for a consistent look. The lacquered fronts of Villeroy & Boch kitchens are available in all the colours of the colour range.

TIMELESSLY ELEGANT:

The “Mettlacher Platte”

When archaeologists came across a Roman floor mosaic in the vicinity of Mettlach, Eugen von Boch was entrusted with the restoration of the old mosaic. These tiles, produced in Mettlach since 1852, have become a great success worldwide as “Mettlacher Platten”.

In a modern way, this tile pattern can now be found as a design element in Villeroy & Boch kitchen furniture, giving it a very individual touch: the filigree, 1 mm deep relief is milled into the kitchen fronts before the surface is painted. The result is a visually impressive interplay of light and shadow.

STEEL SHOWER

Design in every aspect

Thanks to the excellent hand spray you can enjoy maximum freedom of movement and outstanding comfort in the sink area with the functional Steel Shower.

REAL WOOD

Walnut cutlery inserts

The dark brown stained solid wood harmonises with the anthracite grey basic tone of the pull-outs: valuable and timeless. You can flexibly choose from different inserts and combine them very much to your taste. So you can design your Villeroy & Boch kitchen not only by choosing different surfaces and colours; the interior of the kitchen can also be freely selected.

An original

CONNECTION

The exceptional combination of fronts in light oak wood and the ceramic worktop inspired by silver travertine marble makes your Villeroy & Boch kitchen shine.

SILUET 50

The beauty of fine shapes

Siluet captivates with its sensual and filigree lines, made possible by the new ceramic material TitanCeram. The support edge is extremely narrow, the corners have very tight radii and the interior design of the bowl is particularly straight. Siluet thus underlines a simple, minimalist kitchen style and fits particularly well into modern kitchens.

CLEVER SOLUTIONS

Shelves are subject to continuous strain caused by the weight of the dishes and tend to warp over time. The stabilising strip in exclusive Villeroy & Boch design is simply pushed onto the shelf, providing lasting protection against warping, as well as being visually appealing. Cleverly solved.

HARMONY *and lightness*

The vintage look unfolds its charming effect through classic kitchen furniture and materials in soft and muted colours. The harmonious interplay of warm oak and light grey gives your kitchen a feeling of warmth and security.

WITH MUCH LOVE *for detail*

The timelessly beautiful shell handle flirts with its antique vintage look and fits perfectly into the country house kitchen. The central positioning on the fronts of wall and base units creates a consistent image that blends harmoniously into the room planning.

A KITCHEN *with charm*

What could be more attractive than a stylish country house kitchen as the heart of your home?

Villeroy & Boch offers the perfect combination of rural charm and modern furnishings that blend harmoniously into any environment. A systematic storage space planning creates maximum comfort with a traditional appearance. Oversized wall units keep everyday kitchen items within easy reach, without long detours when cooking and baking.

SINK SINGLE BOWL

Timelessly modern individuality

Whether as single or double version, the classic sink is a timeless accessory for the kitchen. Optimally equipped for today's demands it is perfect for your country style kitchen.

INFINITE *possibilities*

Whether classically elegant, cosy, puristically modern or with natural charm: create your Villeroy & Boch kitchen entirely according to your personal wishes. Our interior specialists will support you with the "Villeroy & Boch finest" collection. Selected colours and front materials create a very special atmosphere.

Setting self-confident DESIGN HIGHLIGHTS

AVIA 2.0: The classically elegant fitting with a solid body and a stylish spout. Especially the characteristic handle will attract all the attention. For those who like it nostalgic and contemporary at the same time, this will be the right fitting.

A MODERN
lifestyle

Experience a new lifestyle with a new Villeroy & Boch kitchen: harmonious, relaxed and always on the pulse of time. Modern combinations of materials and colours underline your mindset. The finest grey shades of ceramic surfaces and lacquered fronts perfectly round off our kitchen designs.

SILUET 50 FLAT
Highest functionality in the kitchen

Whether for washing large baking trays, bulky kitchen utensils or delicate glasses: the integrated draining board for ceramic sinks from Villeroy & Boch offers a practical place to drain without putting the worktop under water.

CERAMIC
SURFACES

*Unique and
exclusive*

Ceramic as a material has proven to be stylish and valuable for years. The natural surface makes every Villeroy & Boch kitchen unique. Functionality and aesthetics meet in a unique way.

LACQUERED
SURFACES
with a velvety finish

The perfect composition for your Villeroy & Boch kitchen: the five-part framed front “Meran” made of veneered ash is painted and finished by hand with an elegant velvet varnish in many colours. In the process, the surface achieves a textured finish with a convincing sovereignty. Classical and modern at the same time, the front creates a homely charm.

FINERA
Solutions for the modern kitchen

Finera is modern fittings design in perfection. The clear lines and filigree design set an elegant accent in the kitchen. The finely designed, ergonomic handle, which was specially developed for this collection, is a highlight.

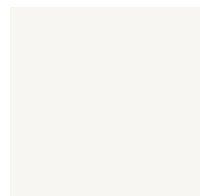

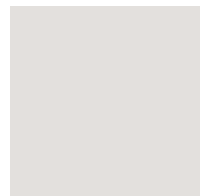

FUNCTIONAL AND BEAUTIFUL

Good function can also be beautiful. Especially the drawers and pull-outs of a kitchen are often in use and are an outstanding distinguishing feature. High stability and perfect running properties are the basis for a long-lasting use. In addition, the high-quality interior compartments offer attractive features.

Satin-finished GLASS SURFACES

The easy-care glass fronts of CALAIS prove that design and utility have many things in common. You can choose between light or high-contrast colours. This way, your Villeroy & Boch kitchen leaves a lasting impression.

Easy KITCHEN PLANNING

To create dining areas or work surfaces with legroom, skids are ideal for the kitchen planning. These can be manufactured individually and supplied in various colours. This way they fit perfectly into your kitchen and room planning.

The difference LIES IN THE DETAIL

The planning of floating shelf elements and cabinets can be individually supplemented by bar flaps. This turns cabinets into true all-rounders within the kitchen and adjacent living areas.

WHEN COOKING becomes something special

Functionality and professional demands can be easily combined. Thanks to a range of built-in appliances with a variety of equipment options, there are no limits to your individual taste – perfectly matching Villeroy & Boch kitchens.

An inner life PERFECTLY IN LINE WITH THE FIRST IMPRESSION

Our hardware technology is a real eye-catcher: show with pride that you own a Villeroy & Boch kitchen. The logo and lettering are discreet indications, also convincing at second glance.

VILLEROY & BOCH

Kitchens – Made in Germany

We think and live quality and guidelines – Made in Germany. We operate in a holistic manner and with much love for detail, optimizing our products on a daily basis and adapting them to our customers' wishes in the best possible way.

For us, obtaining the seals of quality from independent testing institutes are both a challenge and a motivation. We have ourselves and individual furniture components certified by the “Deutsche Gütegemeinschaft Möbel” (German Association for Quality Furniture) and TÜV Rheinland. For every buyer of a Villeroy & Boch kitchen, this creates trust and control. Because the requirements concerning the protection of our environment and the

health of every single owner are high in order to achieve a successful certification.

The selection of our surface components and materials is carried out carefully and sustainably. The effects of static and dynamic loads are tested in elaborate test procedures. This way, we guarantee consistently high-quality craftsmanship and reliable long-term performance in the daily use of our kitchen furniture.

This applies to the carcass plate materials “White” and “Lino Grigio”.

Style is a very personal thing. But how does your individuality perfectly show in the kitchen? Discover the unmistakable style of Villeroy & Boch and choose from the “Villeroy & Boch finest”, a recommendation of individual materials, handles, finishes for surfaces and exclusive colours, specially selected for Villeroy & Boch kitchens.

Whether classically elegant, cosy, puristically modern or with natural charm: create your Villeroy & Boch kitchen entirely according to your personal wishes. Our interior specialists will support you with the “Villeroy & Boch finest” collection. With great passion, they have created a kitchen collection of their own that picks up on the current mood without

being subject to fast-moving trends. Subtle colours, structured surfaces and timeless combinations emphasise your new kitchen at first glance, creating a unit with other collections from the living or dining areas. Be your own architect and make the kitchen the stylish centre of your home with Villeroy & Boch.

CERAMICS IN THE KITCHEN

A lifetime of highest quality

Our worktops and fronts made of high-quality ceramic in currently six different colours meet the highest standards of modern kitchen design. However, ceramic in the kitchen is not only characterised by its high-class appearance, but above all by its functional properties. Kitchen surfaces are subject to heavy wear and tear and are exposed to high levels of stress, as

contact with acidic food, sharp kitchen tools and hot pots is part of their everyday life. The material quality is therefore all the more important. Villeroy & Boch benefits from more than 270 years of experience in the manufacture of kitchen sinks and, fittingly, now also offers the appropriate kitchen surfaces for maximum comfort and minimum maintenance.

HEAT RESISTANCE

Putting down hot oven moulds or pots leaves the ceramic worktops from Villeroy & Boch completely unaffected.

LIGHTFAST IN ANY COLOUR

Even after long, intensive exposure to the sun, each of our ceramic colours remains as beautiful as on the first day.

HYGIENIC

The natural material is odourless and tasteless and therefore absolutely hygienic and food safe.

ACID-RESISTANT & EASY TO CLEAN

Food does not leave any permanent traces on the surface. Even acidic foods can be easily handled by the ceramic.

SCRATCH-RESISTANT

The high-quality surface is so strong that even the use of knives barely leaves any traces.

CERAMIC

As a core competence of Villeroy & Boch, ceramic is used in kitchen furniture as well.

Each front with its 3 mm thick ceramic is unique and it convinces with a distinctive texture. Worktops, side panels and back panels are made of 12 mm thick ceramic, turning your kitchen into a design highlight with its unique look and feel.

Thanks to its high degree of hardness, the material's properties remain unchanged even after intensive use and frequent cleaning.

REAL WOOD

The wood of our Villeroy & Boch kitchen fronts radiates warmth and cosiness. Thanks to its grain, it has a unique look and thus underlines the kitchen design.

Light oak, reddish walnut or hand varnished and refined oak surfaces: there is the right finish for every taste and every room. Create a natural retreat that sometimes looks generously relaxed and sometimes exquisitely luxurious.

Villeroy & Boch woods can be combined excellently with other materials such as ceramic, genuine lacquer or laminate surfaces.

GLASS FRONTS

Glass fronts are available at Villeroy & Boch as satin-finished or high-gloss versions. For safety reasons, tempered glass is used that cannot shatter in the event of a possible breakage. The tempered glass elements are painted in colour on the back. This makes “Villeroy & Boch finest” glass fronts easy to clean and largely scratch-resistant.

As the edges in particular are very sensitive to impact, they are fitted with an all-round aluminium frame. This can be ordered in all colours to match the handle strips and recessed grips. You will find all details on the next page.

DRAWERS, PULL-OUTS AND CUPBOARDS

At Villeroy & Boch, a kitchen does not end with the front. We think further and we think permanently. Thus, we underline the high-class appearance of our kitchens with a high-class interior in drawers and pull-outs, attaching importance to using durable and impressive materials here too.

In addition to inserts made of high-quality real wood, all our cupboards are fitted with top-quality glass shelves made of 8 mm smoked glass. This means that your open cupboard will also be of unsurpassed quality in classic Villeroy & Boch style. The pull-outs of the Villeroy & Boch kitchens with their satin-finish glass inlays underline this high-quality appearance in a complementary manner.

GLASS PULL-OUTS

DRAWERS AND WALNUT INSERTS

GLASS SHELVES: GLASSLINE

Present the contents of your cabinets in a new look: glass shelves provide lightness and transparency. The Villeroy & Boch Glassline is the standard equipment for every kitchen: top-quality and elegant without compromise.

REAL WOOD DRAWERS

Our wooden drawers put the icing on the cake for every Villeroy & Boch kitchen: innumerable possibilities arise when it comes to arrange the interior and they are easily and quickly configured.

The side walls of 13 mm walnut underline the clear, minimalist lines. A special coating process seals the edges and makes them almost invisible. Bowls, knife blocks, foil cutters, boxes, lids or compartments made of felt and leather elegantly round off the high-quality concept.
